

# Package ‘radiant.design’

September 7, 2016

**Type** Package

**Title** Design menu for Radiant. Builds on the radiant.data package

**Version** 0.5.9

**Date** 2016-9-1

**Description** Design menu for Radiant.

**Depends** R (>= 3.3.0),  
radiant.data (>= 0.5.20),  
mvtnorm

**Imports** dplyr (>= 0.5),  
shiny (>= 0.13.2.9003),  
AlgDesign (>= 1.1.7.3),  
import (>= 1.1.0),  
polycor,  
methods

**URL** <https://github.com/radiant-rstats/radiant.design>, <https://radiant-rstats.github.io/docs>

**BugReports** <https://github.com/radiant-rstats/radiant.design/issues>

**License** AGPL-3 | file LICENSE

**LazyData** true

**RoxygenNote** 5.0.1

## R topics documented:

|                                    |          |
|------------------------------------|----------|
| doe . . . . .                      | 2        |
| radiant.design . . . . .           | 2        |
| rndnames . . . . .                 | 3        |
| sample_size . . . . .              | 3        |
| sample_size_comp . . . . .         | 4        |
| sampling . . . . .                 | 5        |
| summary.doe . . . . .              | 6        |
| summary.sample_size . . . . .      | 6        |
| summary.sample_size_comp . . . . . | 7        |
| summary.sampling . . . . .         | 8        |
| <b>Index</b>                       | <b>9</b> |

---

|     |  |
|-----|--|
| doe | <i>Create (partial) factorial design</i> |
|-----|--|

---

**Description**

Create (partial) factorial design

**Usage**

```
doe(factors, int = "", trials = NA, seed = NA)
```

**Arguments**

|         |   |
|---------|---|
| factors | Categorical variables used as input for design  |
| int     | Vector of interaction terms to consider when generating design  |
| trials  | Number of trial to create. If NA then all feasible designs will be considered until a design with perfect D-efficiency is found |
| seed    | Random seed to use as the starting point  |

**Details**

See <https://radiant-rstats.github.io/docs/design/doe.html> for an example in Radiant

**Value**

A list with all variables defined in the function as an object of class doe

**See Also**

[summary.doe](#) to summarize results

**Examples**

```
"price; $10; $13; $16\nfood; popcorn; gourmet; no food" %>% doe
```

---

|                |                       |
|----------------|-----------------------|
| radiant.design | <i>radiant.design</i> |
|----------------|-----------------------|

---

**Description**

radiant.design  
Launch Radiant in the default browser

**Usage**

```
radiant.design()
```

**Details**

See <https://radiant-rstats.github.io/docs> for documentation and tutorials

---

|                       |                         |
|-----------------------|-------------------------|
| <code>rndnames</code> | <i>100 random names</i> |
|-----------------------|-------------------------|

---

**Description**

100 random names

**Usage**

```
data(rndnames)
```

**Format**

A data frame with 100 rows and 2 variables

**Details**

A list of 100 random names generated by [listofrandomnames.com](http://listofrandomnames.com). Description provided in `attr(rndnames,"description")`

---

|                          |                                |
|--------------------------|--------------------------------|
| <code>sample_size</code> | <i>Sample size calculation</i> |
|--------------------------|--------------------------------|

---

**Description**

Sample size calculation

**Usage**

```
sample_size(type = "mean", err_mean = 2, sd_mean = 10, err_prop = 0.1,
  p_prop = 0.5, conf_lev = 1.96, incidence = 1, response = 1,
  pop_correction = "no", pop_size = 1000000)
```

**Arguments**

|                             |  |
|-----------------------------|--|
| <code>type</code>           | Choose "mean" or "proportion"                        |
| <code>err_mean</code>       | Acceptable Error for Mean                            |
| <code>sd_mean</code>        | Standard deviation for Mean                          |
| <code>err_prop</code>       | Acceptable Error for Proportion                      |
| <code>p_prop</code>         | Initial proportion estimate for Proportion           |
| <code>conf_lev</code>       | Confidence level                                     |
| <code>incidence</code>      | Incidence rate (i.e., fraction of valid respondents) |
| <code>response</code>       | Response rate  |
| <code>pop_correction</code> | Apply correction for population size ("yes","no")    |
| <code>pop_size</code>       | Population size                                      |

**Details**

See [https://radiant-rstats.github.io/docs/basics/sample\\_size.html](https://radiant-rstats.github.io/docs/basics/sample_size.html) for an example in Radiant

**Value**

A list of variables defined in sample\_size as an object of class sample\_size

**See Also**

[summary.sample\\_size](#) to summarize results

**Examples**

```
result <- sample_size(type = "mean", err_mean = 2, sd_mean = 10)
```

---

|                  |  |
|------------------|--|
| sample_size_comp | <i>Sample size calculation for comparisons</i> |
|------------------|--|

---

**Description**

Sample size calculation for comparisons

**Usage**

```
sample_size_comp(type, n = NULL, p1 = NULL, p2 = NULL, delta = NULL,
  sd = NULL, conf_lev = NULL, power = NULL, ratio = 1,
  alternative = "two.sided")
```

**Arguments**

|             |  |
|-------------|--|
| type        | Choose "mean" or "proportion"  |
| n           | Sample size  |
| p1          | Proportion 1 (only used when "proportion" is selected)                     |
| p2          | Proportion 2 (only used when "proportion" is selected)                     |
| delta       | Difference in means between two groups (only used when "mean" is selected) |
| sd          | Standard deviation (only used when "mean" is selected)                     |
| conf_lev    | Confidence level   |
| power       | Power  |
| ratio       | Sampling ratio (n1 / n2)   |
| alternative | Two or one sided test  |

**Details**

See [https://radiant-rstats.github.io/docs/basics/sample\\_size\\_comp.html](https://radiant-rstats.github.io/docs/basics/sample_size_comp.html) for an example in Radiant

**Value**

A list of variables defined in `sample_size_comp` as an object of class `sample_size_comp`

**See Also**

`summary.sample_size_comp` to summarize results

---

|          |                               |
|----------|-------------------------------|
| sampling | <i>Simple random sampling</i> |
|----------|-------------------------------|

---

**Description**

Simple random sampling

**Usage**

```
sampling(dataset, var, sample_size, data_filter = "")
```

**Arguments**

|             |   |
|-------------|---|
| dataset     | Dataset name (string). This can be a dataframe in the global environment or an element in an <code>r_data</code> list from Radiant                                    |
| var         | The variable to sample from   |
| sample_size | Number of units to select   |
| data_filter | Expression entered in, e.g., <code>Data &gt; View</code> to filter the dataset in Radiant. The expression should be a string (e.g., <code>"price &gt; 10000"</code> ) |

**Details**

See <https://radiant-rstats.github.io/docs/basics/sampling.html> for an example in Radiant

**Value**

A list of variables defined in `sampling` as an object of class `sampling`

**See Also**

`summary.sampling` to summarize results

**Examples**

```
result <- sampling("rndnames", "Names", 10)
```

---

|             |  |
|-------------|--|
| summary.doe | <i>Summary method for doe function</i> |
|-------------|--|

---

### Description

Summary method for doe function

### Usage

```
## S3 method for class 'doe'  
summary(object, eff = TRUE, part = TRUE, full = TRUE, ...)
```

### Arguments

|        |  |
|--------|--|
| object | Return value from <a href="#">doe</a>              |
| eff    | If TRUE print efficiency output                    |
| part   | If TRUE print partial factorial                    |
| full   | If TRUE print full factorial                       |
| ...    | further arguments passed to or from other methods. |

### Details

See <https://radiant-rstats.github.io/docs/design/doe.html> for an example in Radiant

### See Also

[doe](#) to calculate results

### Examples

```
"price; $10; $13; $16\nfood; popcorn; gourmet; no food" %>% doe %>% summary
```

---

|                     |  |
|---------------------|--|
| summary.sample_size | <i>Summary method for the sample_size function</i> |
|---------------------|--|

---

### Description

Summary method for the sample\_size function

### Usage

```
## S3 method for class 'sample_size'  
summary(object, ...)
```

### Arguments

|        |   |
|--------|---|
| object | Return value from <a href="#">sample_size</a>     |
| ...    | further arguments passed to or from other methods |

## Details

See [https://radiant-rstats.github.io/docs/basics/sample\\_size](https://radiant-rstats.github.io/docs/basics/sample_size) for an example in Radiant

## See Also

[sample\\_size](#) to generate the results

## Examples

```
result <- sample_size(type = "mean", err_mean = 2, sd_mean = 10)
summary(result)
```

---

summary.sample\_size\_comp

*Summary method for the sample\_size\_comp function*

---

## Description

Summary method for the sample\_size\_comp function

## Usage

```
## S3 method for class 'sample_size_comp'
summary(object, ...)
```

## Arguments

|        |  |
|--------|--|
| object | Return value from <a href="#">sample_size_comp</a> |
| ...    | further arguments passed to or from other methods  |

## Details

See [https://radiant-rstats.github.io/docs/basics/sample\\_size\\_comp](https://radiant-rstats.github.io/docs/basics/sample_size_comp) for an example in Radiant

## See Also

[sample\\_size\\_comp](#) to generate the results

---

`summary.sampling`*Summary method for the sampling function*

---

### Description

Summary method for the sampling function

### Usage

```
## S3 method for class 'sampling'  
summary(object, print_sf = TRUE, ...)
```

### Arguments

|                       |   |
|-----------------------|---|
| <code>object</code>   | Return value from <a href="#">sampling</a>        |
| <code>print_sf</code> | Print full sampling frame. Default is TRUE        |
| <code>...</code>      | further arguments passed to or from other methods |

### Details

See <https://radiant-rstats.github.io/docs/basics/sampling> for an example in Radiant

### See Also

[sampling](#) to generate the results

### Examples

```
set.seed(1234)  
result <- sampling("rndnames", "Names", 10)  
summary(result)
```
